

WIC WIX CHANGE CYCLE JUNE 20, 2014

The following change is now available in WIX Production as of June 20, 2014.

1. FIX to the WI008 Report

We received reports that the WI008 report was not counting all “SH” type contacts. It was excluding “SH” types with a number after it (ex: SH99, SH31, etc.) We have corrected the report so that it will now include all “SH” type contacts in the counts.
